

## DATA SHEET

# A450 NOZZLE

Nozzle for PB3/PG31 atmospheric plasma generator

Page 1 of 3

**A450** is a high performance nozzle to be operated with a pulsed atmospheric arc (PAA<sup>®</sup>) plasma generator (PG31) and a pulsed power supply (PS2000).

The nozzle achieves the following functions:

- focussing of the plasma flame
- acting as a grounded cathode to confine the high power electric arc
- forming of the cavity to excite the process gas

### A450 is used for:

surface cleaning, surface activation, thermal treatment and reactive coating. <u>Special features</u>: optimized for high process speeds.

Description				
Nozzle name		A450		
Nozzle length			50 mm	
Orifice diameter		4 mm		
Outer diameter			21 mm	
Mass			90 g	
Process parameters				
Gas types		Air; Nitrogen; Forming gas 95/5		
Gasflow		35 - 80 L/min		
Working distance		5 - 30 mm		
Activation width		10 - 25 mm		
Lifetime (diffuse beam mode)		>500 h (Air) >1000h (Nitrogen)		
Lifetime (focussed beam mode)		>2000h (Air)

#### **Typical activation results**

**A450** typical activation results for the given parameter set of speed and working distance operating with air. Higher surface energies through process parameter ajustment can be achieved.

Surface temperature rise at given parameters for bulk material <100°C.
